

Discover **RIMS**

# Research intelligence, unified.

One platform for your university's entire research footprint — publications, researchers, and global collaborations from five world-class data sources.

## THE CHALLENGE

# Managing research data shouldn't be this hard

Every reporting cycle, the same struggle repeats — and the strategic cost compounds:

### Fragmented data

Publications, citations, and researcher records live across Scopus, OpenAlex, ORCID and institutional silos — each in a different format, none reconciled.

### Manual reconciliation

Research staff spend hundreds of hours every cycle consolidating data that should synchronize automatically.

### Strategic blind spots

Leadership lacks real-time visibility into research performance, SDG contribution, and global collaboration — exactly when ranking submissions and accreditation cycles arrive.

# A single source of truth for your research enterprise

Discover RIMS automatically ingests data from five authoritative global sources, consolidates every researcher profile, and surfaces it through analytics built for ranking submissions, accreditation reporting, and research policy. No manual entry. No reconciliation. Always current.

## Unified Research Intelligence

End manual reconciliation across Scopus, OpenAlex, ORCID, Crossref & Scimago.

## Global Visibility

SEO-optimized profiles, international collaboration maps, ego networks.

## Decision-Grade Analytics

Evidence for QS, THE & ARWU submissions and accreditation.

## Enterprise-Ready

API-first, 99.5% SLA, GDPR-aligned, configurable data residency.

## CAPABILITIES

# A complete research information toolkit

- **Unified researcher profiles** — h-index, citations, ORCID, auto-updated.
- **Auto-sync from global sources** — scheduled, reconciled, zero manual entry.
- **International collaboration maps** — co-authorship by country.
- **Automated SDG mapping** — across all 17 UN Sustainable Development Goals.
- **Decision-grade analytics** — trends, quartiles, faculty benchmarking.
- **Sub-second research search** — full-text, typo-tolerant.
- **One-click PDF export** — CVs, grant submissions, internal reporting.
- **Admin, audit logging & RBAC** — governed, accountable data.

PROVEN IN PRODUCTION

## Trusted by Universitas Hasanuddin

A leading research university — founded 1956, 30,000+ students — chose Discover RIMS to unify its research intelligence.

**2,500+**

Researcher profiles

**15,300+**

Publications synced

**18**

Faculties & units

**40+**

Partner countries

*"Discover RIMS has given Universitas Hasanuddin a single, authoritative view of our entire research enterprise — supporting our strategy to strengthen Unhas's standing among the world's leading research universities."*

— **Prof. Jamaluddin Jompa, Rector, Universitas Hasanuddin (2026–2030)**

## Built to fit your institution

### Cloud Managed (recommended)

Fully managed on AWS/GCP/Azure, data residency of your choice, go-live in ~6 months.

### On-Premise

Full control for strict data-sovereignty requirements.

### Hybrid

Application in the cloud, sensitive data on-premise.

Pricing is a predictable annual subscription, quoted per institution by size and deployment model — enterprise capability without an enterprise-tier budget. Implementation, training, documentation, and a 3-month post-launch warranty are included.
